AMIO - 03029 - JUEGO DE TUBOS TERMORRETRÁCTILES 36 UDS.

Descripción del producto
Set of heat shrink tubing 36pcs

Heat shrinkable tubing is made from radiation cross-linked polyolefins (e.g. polyethylene). They insulate and seal perfectly.

They form a protective, anti-corrosive and decorative layer.

The set includes the following 36pcs heat shrinkable tubing:

-blue 40mm x 3.5 6pcs

-blue 40mm x 2,5 12pcs

-black 40mm x 3,5 6pcs

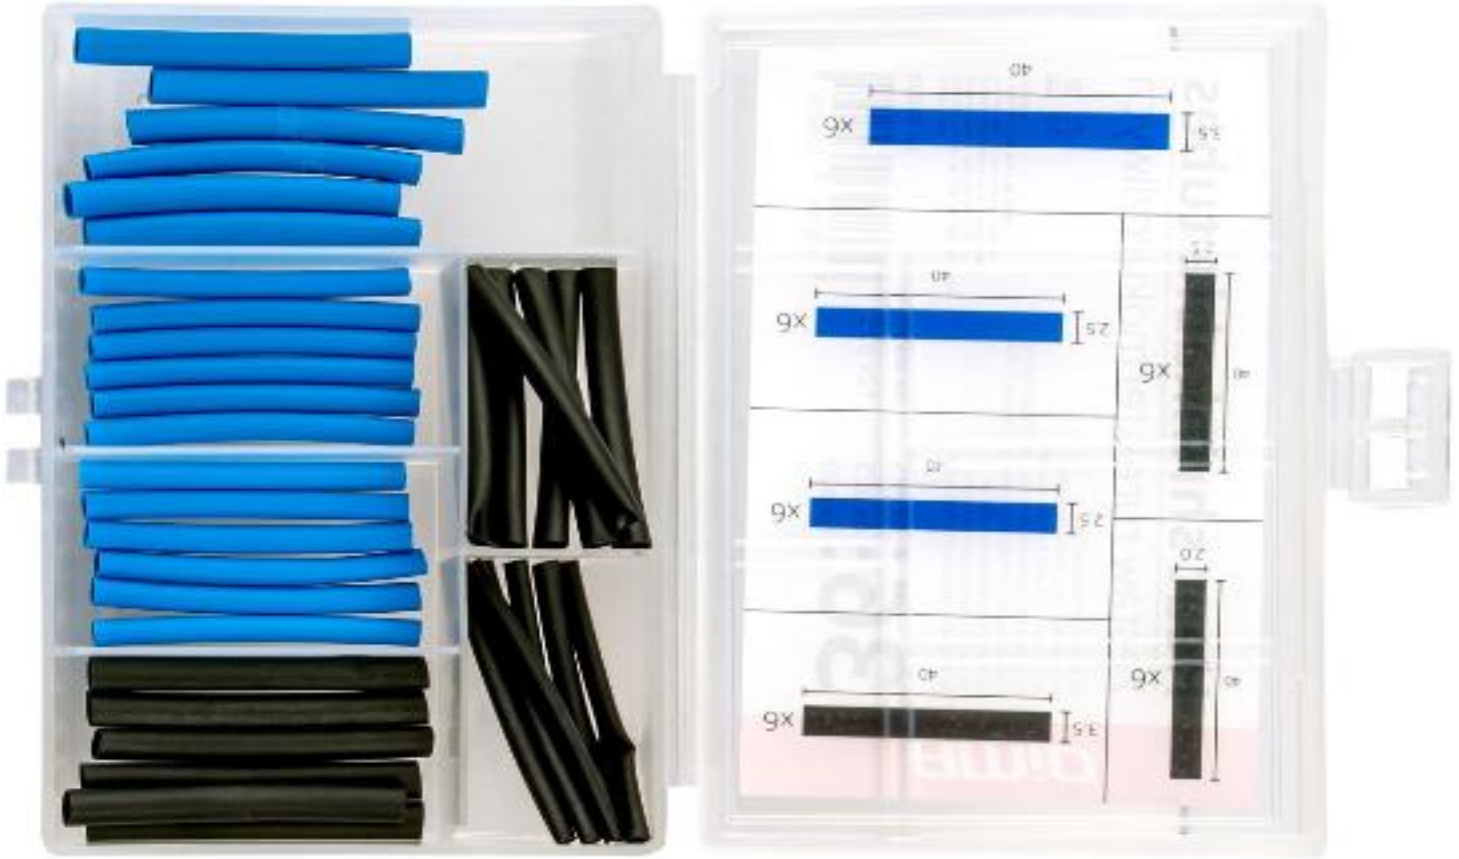

-black 40mm x 2,5 6pcs

-black 40mm x 2,0 6pcs

Application of heat shrink tubes:

Protect the conductor pipe from corrosion . Highly resistant to changing weather conditions. They also protect against moisture. They take the shape of the object they are shrinking and increase its mechanical protection.

Assembly is very simple: simply connect the wires, attach the tubing and heat with a lighter or other device. After this operation, the tubing will shrink by up to half its volume.
